Summary

Senior iOS Developer with 4.5+ years of experience building and scaling production-grade iOS applications using Swift, SwiftUI, and UIKit. Strong ownership of end-to-end feature development, API integration, performance optimization, and App Store releases across consumer-facing domains including Trading, Real Estate, and Grocery Delivery.

- Integrated and optimized RESTful APIs, handling async workflows using async/await, Combine, and GCD.
- Integrated APIs, analytics, and third-party SDKs quickly to validate features and support rapid user growth.
- Experience building and scaling consumer-facing apps such as Trading, Real Estate, and Grocery Delivery.

Technical Skills

Languages: Swift, Dart

Tools: Xcode, Postman, Git, Swift Package Manager.

Frameworks: SwiftUI, UIKit, **Flutter**, Combine, Core Data, and Unit testing(XCTest).

Architecture: MVVM, VIPER, Clean Architecture and Design Patterns (Singleton, Factory, Adapter).

API Integrations: **Firebase**, Google Cloud, Digio KYC, Subsum KYC, Newrelic.

Experience

PropertyShare

May 2023 – Present

Software Engineer

Bangalore

- Designed and developed scalable SwiftUI interfaces using Combine, improving UI responsiveness and maintainability.
- Added **Google and Apple Sign-In authentication**, reducing user friction and streamlining the onboarding process.
- Owned development and maintenance of core app features, handling debugging, testing, and production support.
- Worked with MVVM architecture and used various design patterns such as Factory, Singleton, and Adapter.
- Used Instruments (Time Profiler, SwiftUI, Leaks) to analyze and optimize iOS app performance and memory usage.
- Upgraded app security by applying encryption best practices, secure validation, and modern authentication flows.
- Built an **API monitoring solution using Firebase** to track real-time performance and detect downtime in production.

Deqode

May 2021 – May 2023

Software Engineer

Indore

- Integrated multiple payment gateways (Bank3D, Praxis) for secure and reliable transaction flows.
- Implemented Firebase Performance Monitoring and Google Cloud Logging to identify and resolve production issues.
- Utilized Firebase App Performance to monitor real-time app metrics and resolve performance issues.
- Implemented **Firebase Remote Config** to remotely customize app settings, delivering personalized user experiences.
- Used **Core Data and Keychain** for secure data persistence and authentication workflows.
- Integrated Subsum KYC Verify SDK to enhance user trust and security, providing real-time KYC (Know Your Customer) checks within the app.

Education

LNCT Group of Colleges Bhopal

Sep. 2017 – May 2021

B.Tech in Computer Science

Bhopal, MP
